To whom it may concern,

My name is Kyle Morgan and I am interested in the 2017 Data Science for the Public Good Summer Program. I am a junior at Virginia Tech majoring in mathematics with a minor in statistics, and I plan to pursue employment in a statistical or data-related field.

I learned of the program through an email from Tammy Guynn, the Honors College Operations manager, and I am quite impressed with the opportunity to gain valuable experience while making a significant contribution to a research team. Above all else, I want to use my knowledge of statistics to make a positive impact on society, and I believe this program gives me the perfect opportunity to do that. I have programming experience in R that I feel would be very useful, as well as a strong understanding of linear algebra and other mathematical concepts behind statistics. I would love to have the chance to put this knowledge to use with research that would help people and uphold the reputation of Virginia Tech. My resume is attached with additional qualifications that I believe will help me make valuable contributions to many of the research teams in the DSPG program.

I would be more than happy to schedule an interview at any time that is convenient for you. If you have any additional questions or concerns, please feel free to call or email me at any time. Thank you so much for considering me for your program, and I hope to hear from you soon.

Sincerely,

Kyle Morgan
