

PSG INSTITUTE OF TECHNOLOGY AND APPLIED RESEARCH

Approved by AICTE, New Delhi
Affiliated to Anna University, Chennai

TO WHOMSOEVER I MAY CONCERN

It is my immense pleasure to write this recommendation letter for Kishorekarthick. I have been his Professor during his undergraduate studies and Head of the ECE Department at PSGiTech.

Kishorekarthick has been a hardworking and diligent student, and he also showed interest in Machine learning, Data Science. I found him to be an active participant and a keen listener during my lectures on Linear Integrated Circuits, Discrete – Time Signal Processing, and Principles of Management. Through the interactions with him, I found that he is interested in working with various data like analysis and visualization. He also displays an immense interest in extending his skills through various projects and research. During his research work, I figured out his remarkable ability to apply fundamentals in practical situations and curiosity towards research. He is always disciplined and punctual. He proved his communication skills and explained his ideas with effortless impromptu grace during his research paper presentation on Autonomous vehicles. Being a social person, he is also a team player who learns to adapt to situations.

Mr. Kishorekarthick has also attended workshops, conferences, training, and internships in institutions like Madras Institute of Technology and PSG College of Technology. He was a semi-finalist in the TECHgium national level contest organized by L&T Technology Services for presenting research paper "wireless charger". He has also entered the semi-finals of the India Innovation Challenge Design Contest, a national level contest conducted by Texas Instruments for Waste Separation Robot. Apart from his academics, he has excellent leadership qualities and a great amount of self-awareness. He was part of the National Level Technical Symposium "Yukta:" where he coordinated a circuit designing event called Decoherence in which 300 students participated. He was also appointed as the Department representative for ECE in the National Service Scheme, a national level service organization through which he planted organic gardens in our college campus and organized various events in the community. He served as an executive council member of the Institution of Electronics and Telecommunication Engineers.

To summarize, Kishorekarthick is a proficient student. His active participation in various activities and his consistent performance in academics speaks of his caliber and achievement. He is disciplined and a sincere student. He is polite and easy – going with all his staff and peers. I assure you that he would be an asset to your Summer program as he was for PSGiTech. I wholeheartedly recommend him for the Data Science for public good summer intern program. I wish him the best in all his endeavors.
