4. How long have you known the applicant and under what circumstances have you become familiar with the applicant's academic abilities?

Text Response

I have taught Simon in 2 courses, I sit on his dissertation committee, and he served as my research and teaching assistant. I have known him since he started the Ph.D. program.

5. Please assess the applicant's ability to contribute to the Data Science for the Public Good Fellowship Program.

Text Response

Simon would contribute mightily. Simon has very strong technical skills, excellent social science instincts and training, impeccable organization, and the sort of holistic perspective on social research problems that will allow him to contribute to every facet of the Fellowship. Whether writing efficient code to solve a challenging computational problem or designing a new policy intervention to test from the outset, Simon will excel, as he has in other venues. In my work as Senior Social Scientist with The Lab @ DC, Simon is exactly the type of technical social scientist I hope to work with every day. The Fellowship would be a career-defining opportunity for Simon, and he is perfectly poised to contribute to it.

6. How would you describe the applicant's motivation and initiative in pursuing his/her academic and career goals?

Text Response

Simon is strongly motivated by interesting questions and the pursuit of their answers. He is systematic in laying out plans to contribute to political methodology and survey research in his dissertation. Simon sees the connections between social inquiries in academics, industry, and public service, and he is compelled to investigate them, and to think hard about the best approaches for increasing our knowledge about the social world and citizens' places within it.
