4. How long have you known the applicant and under what circumstances have you become familiar with the applicant's academic abilities?

Text Response

I was Linh Pham's instructor for the Fall 2017 section of Mathematical and Statistical Computing (Math 510). In addition to lectures she was a regular attendee of office hours.

5. Please assess the applicant's ability to contribute to the Data Science for the Public Good Fellowship Program.

Text Response

From her coursework in Math 510 she is familiar with Python programming and data structures, including some familiarity with Pandas dataframes. In addition to base R, she has experience plotting with ggplot2 and plotly, data manipulation with dplyr, and running machine learning algorithms through the caret package. It is my opinion that she would perform well in a research position and that she has the communication skills needed to act as an effective member of a team.

6. How would you describe the applicant's motivation and initiative in pursuing his/her academic and career goals?

Text Response

She was an excellent student who was attentive and inquisitive, asking questions to further her own understanding of the topic at hand and to better understand the context in which the topic exists.
