5. Please assess the applicant's ability to contribute to the Data Science for the Public Good Fellowship Program.

Text Response

I have known Eunji since September 2017 when she enrolled in my graduate level course on Empirical Methods. The course is designed to train students in methodology for conducting empirical research in the social sciences and to provide them with skills needed to understand, interpret and critique a wide range of social science research. Among other topics, the course provided an introduction to probability theory, measurement, causal inference, hypothesis testing and multiple regression analysis. The course also covered a range of special topics with guest speakers providing hands on introductions to GIS, data visualization, social network analysis and STATA. Students' learning in these topic areas was assessed through a combination of homeworks, quizzes and in-class exercises. Eunji's excellent performance in these components of the course earned her a 93 out of 100 – which was the fourth highest mark in a class of 18 students. In addition Eunji also engaged actively in class and contributed thoughtfully to class discussions. Based on her excellent performance in the class, I believe Eunji would add tremendous value to the "Data Science for the Public Good Fellowship Program".

6. How would you describe the applicant's motivation and initiative in pursuing his/her academic and career goals?

Text Response

Eunji has discussed her academic and career goals with me at length and has shown herself to be highly driven and motivated. She is especially passionate about empirical methods and data science and would be an excellent fit for the Fellowship Program.
