5. Please assess the applicant's ability to contribute to the Data Science for the Public Good Fellowship Program.

Text Response

Subhan is highly organized, dependable, and personable and his skills in assessment creation and data analysis have been transformational in moving our office forward in assessing the reach and impact of our programs. Subhan quickly learned all of the software that our office uses for finances, registration, and program evaluations. He then proposed a means for making our system of registrations and assessments consistent across all of our programs. He has methodically moved us toward implementing this consistency. Subhan has also been our primary contact with the university's Office of Programmatic and Institutional Research. He keeps this communication open to ensure that we abide by university standards. Subhan will have great ability to contribute to your program.

6. How would you describe the applicant's motivation and initiative in pursuing his/her academic and career goals?

Text Response

Subhan is one of the most motivated graduate assistants our office has ever had. He takes initiative daily in proposing next steps for moving our data collection and program evaluation forward. He immediately and continuously follows up with each stakeholder in order to gather the needed information or support them in completing the next step in the process. During his off hours, Subhan is often in our lounge area working on the coursework for his M.S. in Applied Statistics. He is completed dedicated to the completion of his degree.
